

4th UXHMAC X HUAWEI AppGallery MOBILE APP COMPETITION 2025

Track A: Innovation Mobile App Design and Pitching Presentation

Basic Information	
University / College Name	Tunku Abdul Rahman University of Management and Technology (TARUMT)
Team Name	EduHer
Team member 1 (Team leader) 	Full Name: Lee Xin Yi Phone Number: 60194308818 Email: xylee-wp23@student.tarc.edu.my Course / Year: Bachelor of Software Engineering, Year 2 Semester 1
Team member 2 	Full Name: Lew Zhi Hui Phone Number: 60176929538 Email: lewzh-wp23@student.tarc.edu.my Course / Year: Bachelor of Software Engineering, Year 2 Semester 1
Team member 3 	Full Name: Koh Jun Keat Phone Number: 6011 1675 1028 Email: keatkj205@gmail.com / kohjk-wp23@student.tarc.edu.my Course / Year: Bachelor in Data Science, Year 2 Semester 1
Project Information	

Project Name	EduHer
Scenarios	Education, People's Livelihood/Public Sectors and Healthcare (Mental and Emotional Well-being)
AI Element + Huawei Mobile Service (Option 1)	✓ AI tool used: ChatGPT • It is used for the feature of AI Listener. • It powers the compassionate chat interface in the Safety Circle. • It provides immediate, context-aware emotional support through the AI element and guides users to the most appropriate help resources based on their conversation.
Huawei AI HMS Toolkit (Option 2)	
Sustainable Development Goal (SDG)	SDG 4: Quality Education • EduHer promotes inclusive and accessible learning via personalized courses, downloadable resources and AI recommendations. • It supports lifelong learning by tracking progress, motivating streaks and fostering personal growth. SDG 5: Gender Equality • EduHer promotes a safe space for women to report harassment and access support services. • It empowers women through education on rights, finance and leadership. • It builds a community that encourages sharing, empowerment and equality.

Project Summary (Up to 500 words)	i. Research implication 1. Project background and significance • There are over 1.2 billion women and girls who live in places where safe access to abortion is restricted. • Millions of women and girls are in extreme poverty. • Millions of girls under 18 are married each year. 2. Problem Statement • They face socio-economic factors, child marriage and violence issues. • Become a barrier to acquire more education. • Lack of proper infrastructure also leads to worse education quality. 3. Objective • Provide easy access to education to promote Gender Equality (SDG 5). • Provide lessons for basic subjects like math and advanced knowledge like leadership • Include features like anonymous reporting or online consultant. 4. Project Scope • EduHer is a mobile app that empowers women and girls by bridging the gender gap with the slogan “She Learns. She Leads.”. • Core Pillars: 1. Learn: Courses that support SDG 4 & SDG 5 2. Safety: Anonymous harassment reporting and support. 3. Community: Supportive network for women. ii. Design approach and scheme (Key points) 1. Design Ideas • Design Ideas: System architecture shows the user flow and HMS integration. 2. Solution feasibility • Prototype screens are designed to highlight the features aligned with SDG 4 and SDG 5. 3. Key technologies used (must include 1 HMS) • ML Kit NLP, Translation, Speech, Image/Text Recognition • Account Kit Authentication, SSO, Profile Sync • Location Kit GPS, Geofencing, Activity • Video Kit
---	---

	Video Streaming, Adaptive Bitrate, DRM • Push Kit - Notifications, Engagement • ChatGPT API - AI Conversation Support • RDS / MySQL - Data Storage & Analytics 4. SDG Alignment (min 1 SDG, max 5 SDG) SDG 4: Quality Education • Inclusive Learning Access: Offers learning paths from basic literacy to leadership and digital skills. • Multimedia Learning: Provides video, audio, and text resources for diverse learning needs. • Lifelong Learning: Tracks progress and uses goals and badges to motivate continuous learning. • Accessible Education: Ensures free, quality content for all learners. SDG 5: Gender Equality • Anonymous Reporting: Allows safe, private reporting of harassment or discrimination. • AI Listener: Provides immediate emotional support. • Support Connection: Links users to NGOs, legal aid, and crisis hotlines. • Community Voice: Builds a supportive community for sharing and empowerment. iii. Applications 1. Application prospect • Strong potential for growth in reach and functionality. • Initial target: young women in Southeast Asia. • Future expansion: global markets with localized content. • Plans to partner with companies and schools for upskilling and education. • Long-term goal: build a full ecosystem for women's empowerment with micro-certifications and career services.
